Tony Hill : Creating Realistic Landscapes for Model Railways before purchasing it in order to gauge whether or not it would be worth my time, and all praised Creating Realistic Landscapes for Model Railways:

5 of 5 people found the following review helpful. Interesting ideas; I look forward to trying them
By Comment Man
This book is full of good ideas for modeling scenery for model railroads; many of them are quite different from ideas in the American books. Hill has extensive ideas on modeling water, trees and stone walls. I plan on trying his technique for modeling waterfalls and maybe his use of clay for modeling walls. I have a suspicion many of his ideas would work best in HO or larger scales (I model in N scale); his ideas for trees are particularly extensive and interesting. I think this book is worth having, if only to complement the other scenery books you have, but the price is a bit outrageous. I bought the book through marketplace for half the price listed. Its a very nice book printed from durable paper covered with a plastic coating, so you could consult it while you actually worked on the railroad.

Met expectations

The landscape through which railways run is often the inspiration and reason why people choose to model a particular line. Therefore creating a realistic setting in which to operate your railway is an essential aspect of modeling, yet it is often overlooked or left until the last moment. Creating authentic and believable scenery without spending a fortune or buying it 'ready made' is a skill that, with patience and understanding, can be achieved. In Creating Realistic Landscapes for Model Railways, highly skilled landscape modeler Tony Hill shows you, through step-by-step photo

sequences and clear instructions, how you too can re-create a realistic landscape for your model railway.

About the AuthorModel landscape expert Tony Hill has been modelling railways for over thirty years. A carpenter by trade, he has been demonstrating and teaching his landscape modelling skills at model railway shows since the early 1980s, has written numerous articles on the subject and undertakes commissions for bespoke trees and dioramas. This is his second book on the subject.
