So anyone who loves butterflies will enjoy this one. There are names on some of the pictures of the butterflies, so it is great to share with others. Kids and adults both will have fun coloring in this one. It is a nice, thick book with lots of pages.1 of 1 people found the following review helpful. Great FUN! book has a bunch of pages with different names on them which is great for coloring or framing for a friend. I can't wait to see what D. McDonald does next!

This is a family fun coloring book that will appeal to young and not so young. The designs are great for neon colors and bold markers! There is a second copy of the designs that start over after a name section so no one has to fight over a design...there is a second one! There are over forty names one might be yours or someone you know to share them with!
