I am the sadistic person that LOVES to address holiday cards! I was excited to add this book to my lettering collection, in part, because the cover boasts "7 unique fonts to learn" on it. Uh, no. These are \*not\* unique fonts, nor are any of the project ideas in the book particularly original, inspiring, or well done. The average person can execute any of these projects--as well as, or better--without the directions in the book. Most disappointing, however, is that the hand lettering examples on many of the projects aren't actually pleasing to the eye and simple details like writing in a straight line seem to be lost on the authors.
