In it you will find a storehouse of motifs centered around a country "style" BUT Kooler's country is not ordinary country. The chapters themselves are divided into specific themes. Then with a sampler depicting each theme at the beginning of that section, and after charts showing how to accomplish this piece, you arrive at a library of similar motifs which you may use in other projects or substitute in the original design. The variety is remarkable. From planes, trains and automobiles to horses and ships, borders and motorcycles, quilts and farm equipment and more. On and on it goes, Bon Voyage, Celebrations, Friendship, even topiary. Kooler is Kooler and that is synonymous with bounty. Yes, there

are cutsey designs here but the lovely ones outway them by "a country mile." Also, an accomplished cross-stitcher would be able to put them together to design a stunning work that did not come off "country" if they wanted this. In the back there is a beautiful selection of assorted butterflies on the last page. You will also find some more contemporary motifs sprinkled among pages in other areas of the book. I'm glad I have it. Once again, you cannot beat the price. 0 of 0 people found the following review helpful. Five Stars By Diane Sayers great
