Ebeling-urbanThis book is ahead of it's time, the designs would work today, no cutesy, trite-dated looking projects here. I wish more info was shared on how long to bake items, and more recipes for different types of salt doughs; having said that, for those who need to follow projects to the "T" this is the book for you as one can create sophisticated designs through carefully documented instructions.0 of 0 people found the following review helpful. Straight forward and easy toBy Michele Kemp ShockleyLooking forward to making some of the items in this book. Xmas and all. I finally ordered it because I have always wanted to make a sun. I know everyone has different taste but for me this is a book that shows you how to make a large verietiy of things. From simple to hard. I am very glad I ordered it. I would recommend it to anyone wanting to try salt dough sculpting.

No wonder dough crafts are becoming more popular all the time. It's the most inexpensive modeling medium in the world. And now, due to some recent techniques, your projects can last a lifetime. Forty original, step-by-step projects

let you explore salt dough's versatility. They include: Citrus-fruit plates with "looks-real-enough-to-eat oranges and lemons. A welcoming sun plaque. A colorful court jester doll. Stunning carnival masks. Those with traditional tastes can capture bygone charm with a folk angel, gingerbread heart, or fruit-filled cornucopia, while a cowboy-theme Tex-Mex clock, unique metal-embedded bowls, and a checkerboard covered with friendly lizards will be delightful additions to contemporary decors. Because it's completely non-toxic, salt dough is ideal for children. Animal finger puppets and a dinosaur are fun toys that kids can make by themselves or with an adult friend. All techniques for kneading, coloring, drying and baking, painting, glazing and varnishing are clearly explained, including how to use basic household items such as scissors, toothpicks and wire to achieve spectacular effects. 160 pages (all in color), 9 x 11.

From BooklistEvery five years or so, another writer-craftsperson discovers the nineteenth-century German concoction of salt dough and molds it to current design trends. Unlike her predecessors, Owen actually demonstrates how to sculpt practical items, from mirrors and pencil holders to serving dishes and wall clocks. Motifs for the more than 40 projects are inspired by country and folk art as well as contemporary fads; a Mexican tree of life, for instance, is presented alongside a hanging, chubby-cheeked folk angel and a rotund, generic dinosaur. Directions are plentiful, including color photographs of the more complicated steps. Barbara Jacobs
