John Boardman : Early Greek Vase Painting, 11th-6th Centuries BC: A Handbook (World of Art) before purchasing it in order to gage whether or not it would be worth my time, and all praised Early Greek Vase Painting, 11th-6th Centuries BC: A Handbook (World of Art):

1 of 4 people found the following review helpful. Information is importantBy Sanni M. SlabbertThis book tells about, how and why as well as when the works were produced. There is enough given for the interested student to wish to learn more.Thank you for excellent service.22 of 23 people found the following review helpful. early greek vasesBy francesca waltonJohn Boardmans' series of books on Greek vases are a rare treat for the general public. Early Greek

Vase Painting investigates and unravels the early history of Greek vases. Boardman begins, naturally, with the Attic geometric style and proceeds to show us how it was the basis for all later Greek vase painting. He traces the development to narrative representation, while discussing stylistic influences and regional differences. Individual artists are recognized for their contributions and personal quirks. There are many (511) photographs and a small but useful chart. Pictures are extremely well chosen to illustrate the author's text. Boardman casts a new light on the dawn of Greek vases - a remarkable work!

All the components of Greek art which were to culminate in the Classical styles of the 5th century BC can be traced in the development of vase painting in early Greece, from the 11th to the 6th centuries BC. Geometric styles gave way by about 700 BC to the influence of the Near East; in the following Orientalizing period the Greeks learned how to tell a story in pictures; and by the 6th century various regional studios were competing with the dominant Corinthian and Athenian potters and painters for markets east and west. Early Greek vases display the Greek painter's craft at its most mathematical, its most colorful, and in its most directly narrative mode. They closely mirror the history and culture of their day. The later achievements of Greek art can only be fully understood in the light of this formative period of variety, competition and experiment.

About the Author Sir John Boardman is Lincoln Professor Emeritus of Classical Archaeology at Oxford. His books include the companion volumes Athenian Black Figure Vases, Athenian Red Figure Vases: The Archaic Period, and Athenian Red Figure Vases: The Classical Period.
