Okay I really like this book By Jasmine Okay I really like this book, most of the earrings are great, I love that there are picture/illustrations, but for someone beginning out in jewelry there are a few bits that I feel are omitted like For example: There are some pearl chain and rhinestone chain earrings there's a list of what you need, but on step 5 it requires you to use one of the larger bead caps. What? This particular bead cap in the pic was not listed.. The other design I really loved and wanted to make a somewhat similar pair was the Tropicana earrings. I looked everywhere to find this knitted wire mesh something at least similar, found the exact same mesh but it was available for \$20 for just 9 inches \$48 for 20 inches! the same wire mesh isn't in the what you will need section in the beginning of the the book. 1 of 1 people found the following review helpful. Automium ball earring diaster By beadqueen I was really disappointed with this book. I bought this book mainly because I wanted to

make the atomium ball earrings on page 43. The pattern must be off because I was never able to make them right. I got so frustrated that I even took them to my local bead store neither person in the store could figure it out either. 2 of 2 people found the following review helpful. Definitely a Keeper  
By drc536I own the necklaceology book and this book is a great follow up. As usual, Candie's design run from easy to more complex, really cute, and most patterns work amazingly fast. Definitely a keeper!

In her stunning follow up to *Necklaceology*, Candie Cooper creates 50 beautiful beaded earring projects that are fun for both beginners and seasoned beaders. Stylish and feminine, they work for the office, a night on the town, or a casual weekend. In addition to beads and wire, these lovely pieces of jewelry include leather, clay, charms, found objects, and other fun materials. Cooper's accessible instructions on tools and techniques, plus plenty of detailed photos, guide you every step of the way.
