Other years I did not have any problem.2 of 2 people found the following review helpful. Great entertainment for little kidsBy Katherine MaddoxFirst of all, I certainly didn't notice that my pages weren't square, so, after reading these reviews, I measured. My pages ARE square, so I'm not sure what problem other people are having.But I wouldn't care anyway. This calendar has turned into the most fantastic toy for my almost-four-year-old son. We got this calendar in late January and have been working our way through it ever since (we really aren't using it as a calendar). He loves playing with all the little animals and boats and sleds and such and I really am enjoying making them for him. And, being made out of paper, they last about as long as his attention span and then we make something new!Each morning you pick up the previous day's sheet of paper and follow the present day's instructions to make something new. The colors change every few weeks and many have pretty patterns on them. It's fun to see what each paper is going to look like. Since the intructions are on the white side of the paper, the white parts of your creation sometimes have writing on them. No big deal.I find the instructions clear and pretty easy to follow. It seems to build in difficulty as the year goes on. There are a few instructional pages scattered throughout the year that don't actually make anything, but we've just used those to skip ahead and make something new.So, if you have kids, this is quite a fun toy and you certainly shouldn't worry about what time of year it is to start!1 of 2 people found the following review helpful. Good, not great.By E. SaxtonI had the paper airplane calendar last year and thought that this would be even better. Now I'm wishing I had gotten the paper airplane calendar again.My biggest complaint is that the pages are not even square. If you look at them, they look square, but all you have to do is give one diagonal fold to discover that they're off by a couple millimeters.Another complaint is that there have been several days that have either one very

simple fold that makes nothing, or a wordy and unnecessary explanation with nothing to fold on that day. This calendar is fine, but until they fix the non-square paper and lose the boring days, I'll stick with the airplanes where it doesn't matter if the paper is square or not.

2007 calendar. "Don't throw yesterday away, just fold it." Every day contains a new figure and easy-to-follow instructions for making it.
