It takes you step by step from a simple felted scarf to more and more design elements where you can take the ideas and develop more yourself. It does work totally with wool, but I developed the idea and tried different natural fibers, like angora and alpaca and found it worked just the same. Great inspiration and the instruction is very good.

In this enticing new book, the author demonstrates how to use the inspiration of nature in the design and color of beautiful and distinctive scarves and wraps. Readers can follow the step-by-step instructions and explore the collection of colors, textures and patterns in the project variations to create their own stylish scarves and wraps for both men and women. Each chapter has a different theme, and introduces new felt making techniques or skills through step-by-step instruction and extended captions, plus the projects are arranged according to weight for a variety of uses and conditions.

About the Author Jill Denton first discovered feltmaking about 12 years ago and admits to being addicted ever since. The inspiration for her work comes from the landscapes of England's West Country, old-fashioned flowers in her cottage garden, the vibrant hues of India and Indonesia and the cool colors of the Caribbean.
