A collection of embroideries and Patterns from 19th Century Vienna in this book are shown as samplers motifs and decorative patterns such as garlands, flowers, animals and landscapes. The most significant patterns of the collections are integrated with other examples drawn from different sources in order to a give a more rounded and complete historical and stylistic account of the period under consideration.

The book is what I expected as far as content, but it was badly damaged. The hard cover is torn and loose and the book is bent. I knew it was used, but I didn't expect it to look like it fell out of the car at 60 mph and then run over by a semi truck.

Embroideries and Patterns from 19th Century Vienna is the first book devoted entirely to the petit-point of nineteenth century Vienna. Raffaella Serena surveys samplers motifs and decorative patterns such as garlands, flowers, animals and landscapes. The most significant patterns of the Nowotny collections are integrated with other examples drawn from different sources in order to a give a more rounded and complete historical and stylistic account of the period under consideration.
