They are expensive and have been on my "wish list" for years. They are big and heavy and worth every penny. If you are into conifers, this set is a MUST HAVE.2 of 2 people found the following review helpful. Easily the best work on subject to dateBy doug wilson Compiling and describing this nearly unending list of cultivated conifers and ginkgos had to be a herculean effort. Combining this information with the most comprehensive seasonal-sensative photography imaginable makes for many satisfying evenings of page flipping for even the most die-hard conehead. Did they list them all? Not quite but they came very close. Doug Fir
