You must have if you like mosaic and you learned it already, if you want to do something for first time, buy another book.By Marcela G-TBeautiful book, but it name said all, is really like an encyclopedia. Doesn't have step by step project, but there are pics of very beautiful finished projects around the word and his authors.0 of 0 people found the following review helpful. It is literally an encyclopediaBy KellyIt wasn't clear to me when I bought this book that it was only an encyclopedia. I believed I would be getting techniques, info about materials and some designs. That did not turn out to be the case. I may pick this book up on rare occasions but not as frequently as I would have liked.0 of 1 people found the following review helpful. it's an encyclopedia.By Barbara A. HirschIt's really an encyclopedia, and the description wasn't clear to me. I was disappointed. I couldn't tell that before I bought it.

The ultimate illustrated reference for mosaic workers, including detailed A to Z entries on materials, tools, design, techniques, and more.
