Am working on the butterfly pattern in the book and it moves quickly with this awesome technique. Am hopeful that this author will release another fast peyote pattern book soon since once you begin using that technique, you want more patterns to chose from. Haven't figured out how to (or if I can) adapt fast peyote to regular peyote patterns. If anyone knows how, that would be great to know. Meanwhile, this is a great book, fairly priced. A magnification bar to help read the small print on the pattern rows is also helpful when doing the projects. I also print out the pattern so I don't break the spine of the book while I am working the pattern. Please write another book--this one is great!0 of 0 people found the following review helpful. look for different patterns no futherBy Cantripeasy to follow patternsprint is easy to read making the patterns

extremely easy to follow. 1 of 1 people found the following review helpful. Can't wait to try some of these patterns. By Sharon B Haven't had time to get anything made with this pattern book. Browsing makes me want to get it. Bright fun looking designs. Technique should be easy to pick up by anyone who does regular peyote.

In this book, designer Josie Fabre shares several techniques that allow for much quicker creation of the Peyote stitch. While this stitch is often the first stitch learned by beginning stitchers, it is extremely time-consuming. She simplifies the process with her detailed instructions and original, multi-drop, flat peyote patterns. Keeping beginners in mind, the book has 25+ beautiful projects designed with a minimum of colors, making the patterns easier to follow and faster to create. Her inspired bracelet patterns range from the traditional wide to slim width, some include clean edging, some are finished with a stitched toggle clasp, and others use a double clasp. While bracelets are the main jewelry piece created in peyote stitch, Josie has also added necklaces and earrings to her mix in this book.

About the Author Josie Fabre fell in love with stitching while in graduate school. As a full-time scientist and mother, she still beads every chance she gets. Her designs are often inspired by photographs she takes. Over ten years she has designed many popular projects for Bead Button magazine. She lives in Sidell, LA.
