Horton I have of late become obsessed with cross stitch and embroidery and a favorite warm-weather passion is growing flowers. This book has 50 different flower designs approximately the same size, about 4x6 inches finished, worked on 36-count white linen using either Anchor or DMC stranded floss. Most of the projects are worked with one strand of thread over two threads of fabric. This gives the work a light and airy appearance which reminds me of a watercolor. The charts are large and very easy to read. The directions are clearly laid out. Although I am quite inexperienced, I am confident of being able to complete

the designs. The book was very pricey, ordered through , but when divided by the cost for each pattern, it seems not so expensive. These designs make cross stitch look so much more elegant and beautiful than most. It will be a pleasure to work every one.

Thea Gouverneur's Flower Portraits is a delectable selection of cross stitch designs for fifty favourite flowers. Arranged into fields of colour, these designs are certain to inspire beginners and have experienced cross-stitchers rushing for their embroidery frames. Following in the footsteps of the popular Secret Garden in Cross Stitch, these fresh flower portraits will bring the delight of the flowering garden into the home all year round.
