Mark Bolitho : Fold Your Own Origami Navy (Origami Army) before purchasing it in order to gage whether or not it would be worth my time, and all praised Fold Your Own Origami Navy (Origami Army):

The United States has the largest Navy in the world, with over 250 ships currently in active service. Origami offers a unique perspective on the ships, carriers, and cargo associated with this iconic branch of the United States military. Students new to origami will benefit from the offered in the book's introduction. This book includes illustrated, step-by-step instructions for folding barges, ships, aircraft carriers, and more.

From School Library Journal Gr 4-8-Each of these books begins with a basic introductory spread, While the other three introductions offer general information, Weapons can be uncomfortably specific given the age of the target audience.

Each book proceeds with six identical pages that provide a list of materials and diagrams of basic techniques, followed by between five-and-seven projects that result in items such as a long-range bomber, battleship, or tank. Again, there are some uncomfortable statements. In *Army*, the preface to "Artillery" states, "Take aim with this great looking artillery piece." *Weapons* refers to an automatic pistol as a "neat little weapon" and a missile as "real fun to have around."
