Fantastic models for a rewarding hobby By Matthew Boehm Marc Hagan-Guirey has managed to improve on his excellent "Horrorigami" book and set a new bar for Kirigami models. First off, the pages are 11"x14", almost twice the area of Horrorigami's pages. This results in some very impressive models with details that may have been harder to pull off at a smaller scale. Secondly, this book comes with many of its most intricate details pre-cut. While this might sound like "cheating" to some, anyone who has struggled through cutting dozens of rectangular windows can tell you that this can be incredibly tedious and challenging. Having

so many small parallel lines next to each other magnifies every little imperfection, and no matter how skilled you are, there will probably be a couple imperfections among dozens of tiny cuts like that. There is still plenty of challenging/rewarding work to do with those cuts eliminated, and I'm happy to see them gone. Kirigami is pretty easy to get into, requiring just an X-Acto, a metal ruler, and a cutting surface. As a total novice, I was able to make good-looking models in around an hour or so. However, there is always room to improve your technique, and when you combine this with the sense of relaxation and focus that you feel when cutting out these models, it makes for a really rewarding hobby. 0 of 0 people found the following review helpful. Details are First Rate! By J. Hendrickson This was a gift for my husband, who is a fan of FLW. He's also an artist. He says they are as close to an architectural model as he's seen. 0 of 0 people found the following review helpful. Four Stars By Kristie Lee Happy with the book

Frank Lloyd Wright (1867-1959) is the most renowned and popular architect and designer in America. His buildings, including Fallingwater and New York's Guggenheim Museum, are iconic landmarks. Now you can create 14 of his best loved buildings using the art of kirigami (cutting and folding). Each project features step-by-step instructions and a template that you remove from the book. You follow the lines on the template, cutting and folding to make your own model. All you need is a craft knife, a cutting mat, and a ruler. Clear cutting tips help you with the tricky stages, while photos of the finished model show you the final design. To make things easier, the most intricate parts of the templates are pre-die-cut. Then simply display your finished model and admire your handiwork. Suitable for folding experts and beginners alike, Frank Lloyd Wright Paper Models is a must for Wright fans and architectural model enthusiasts.

About the Author Marc Hagan-Guirey is a kirigami paper artist and design director. His kirigami commissions for both private and commercial clients include pieces for Samsung Galaxy, Procter Gamble, and Decorex International. He is the author of Paper Dandy's Horrorgami (Laurence King, 2015).
